

- B. a solvent comprising water and an alcohol, the alcohol comprising between about 0.01% and 15% of the solvent and having a ClogP of from about 0.15 to about 0.64, the alcohol lacking a center of symmetry; and
- C. the balance adjunct materials,
wherein the fabric care composition is substantially free of starch, and
wherein the fabric care composition is substantially free of silicone.

12. The fabric care composition of Claim 11, wherein the adjunct material is selected from the group consisting of perfumes, surfactants, antibacterial agents, pH buffers, dyes, optical brighteners, viscosity/dispersability modifiers, dye transfer inhibition agents, soil release agent, phase stabilizers, stabilizers, and mixtures thereof.

13. The fabric care composition of Claim 11, wherein the fabric softening active is selected from the group consisting of quaternary ammonium compounds or amine precursors thereof, cationic ammonium softening compounds, nonionic softening compounds, and mixtures thereof.

14. The composition of claim 11, wherein the solvent is selected from the group consisting of C₆ diols, C₇ diols, octanediol isomers, butanediol derivatives, trimethylpentanediol isomers, ethylmethylpentanediol isomers, propyl pentanediol isomers, dimethylhexanediol isomers, ethylhexanediol isomers, methylheptanediol isomers, octanediol isomers, nonanediol isomers, alkyl glyceryl ethers, di(hydroxy alkyl) ethers, and aryl glyceryl ethers, aromatic glyceryl ethers, alicyclic diols and derivatives, C₃C₇ diol alkoxyated derivatives, aromatic diols, and unsaturated diols.

15. The composition of claim 14, wherein the solvent is selected from the group consisting of pentanediols and hexanediols.

16. The composition of claim 15, wherein the solvent is selected from the group comprising 1,2-hexanediol, 2-ethyl-1,3-hexanediol, 2,2,4-trimethyl-1,3-pentanediol.

17. A fabric care method comprising the steps of:

- A. providing a clear or translucent fabric care composition comprising:
- i. from about 0.01 to about 1% of a fabric softening active by weight;
 - ii. a solvent comprising water and an alcohol, the alcohol comprising between about 0.01% and 15% of the solvent and having a ClogP of from about 0.15 to about 0.64, the alcohol lacking a center of symmetry; and
 - iii. the balance adjunct materials;
- B. applying the fabric care composition directly onto a fabric; and
- C. ironing the fabric,

wherein the fabric care composition is substantially free of starch, and wherein the fabric care composition is substantially free of silicone.

18. The fabric care method of Claim 17, wherein the fabric care composition is applied directly onto the fabric by spraying.

19. The fabric care method of Claim 17, further comprising the step of laundering the fabric prior to applying the fabric care composition.

20. A fabric care kit comprising a container comprising a hollow body member having at least one reservoir, and at least one application mechanism in connected relation to the reservoir, the reservoir containing a clear or translucent fabric care composition, wherein the fabric care composition comprises:

- i. from about 0.01 to about 1% of a fabric softening active by weight;
- ii. a solvent comprising water and an alcohol, the alcohol comprising between about 0.01% and 15% of the solvent and having a ClogP of from about 0.15 to about 0.64, the alcohol lacking a center of symmetry; and
- iii. the balance adjunct materials,

wherein the fabric care composition is substantially free of starch, and wherein the fabric care composition is substantially free of silicone.

21. The fabric care kit of Claim 20, wherein the application mechanism is a spraying mechanism.

22. A fabric care method comprising the steps of:

A. providing a clear or translucent concentrated fabric care composition comprising:

i. from about 1% to about 75% of a fabric softening active by weight;

ii. a solvent comprising water and an alcohol, the alcohol comprising between about 0.01% and 15% of the solvent and having a ClogP of from about 0.15 to about 0.64, the alcohol lacking a center of symmetry; and

iii. the balance adjunct materials;

B. providing a dilution solvent;

C. diluting the concentrated fabric care composition with the dilution solvent, at a dilution ratio of from about 1:1 to about 1:100, to form a fabric care composition;

D. applying the fabric care composition directly onto a fabric; and

E. ironing the fabric,

wherein the fabric care composition is substantially free of starch.

23. A concentrated fabric care kit comprising a hollow body member, dilution instructions, application instructions, and ironing instructions, wherein the hollow body member has at least one reservoir, the reservoir containing a clear or translucent concentrated fabric care composition, wherein the concentrated fabric care composition comprises:

i. from about 1% to about 75% of a fabric softening active by weight;

ii. a solvent comprising water and an alcohol, the alcohol comprising between about 0.01% and 15% of the solvent

and having a ClogP of from about 0.15 to about 0.64, the alcohol lacking a center of symmetry; and

iii. the balance adjunct materials, and wherein when the concentrated fabric care composition is diluted according to the dilution instructions, the concentrated fabric care composition forms a fabric care composition which is substantially free of starch.
